

*IN THE YEAR TWO THOUSAND AND NINE*

*Whereas*, wireless internet service is becoming the industry standard for communication;

*Whereas*, many institutions are converting to completely wireless facilities;

*Whereas*, the students who live on campus are the ones that utilize the campus's internet resources the most hours of the day;

*Whereas*, all residential students on all floors in towers style residence halls do not have equal opportunity to use wireless internet.

*Let it be resolved*, as a first step to move towards a more modern campus that wireless routers be installed in the sixth (6<sup>th</sup>) floor telecommunications room of every tower style residence hall.

*Let it further be resolved*, that Senator Michael Hershfield will investigate measures to getting Hofstra's campus completely wireless.

*Let it further be resolved*, that the entire residential side of campus will become completely wireless by the end of the Spring 2011 semester.
