        vi. Questions:
            1.

for all students. From the data, our campus is safe but feeling safe is different and hearing from students is how we can make that happen.

2. Chair Congdon: Some of the residential security systems are faulty, is Public Safety working on this or replacing these systems?
    a. We are switching card access services at the moment. We are aware of the card issues in residential buildings. Some of those issues fall under Plant and it is something that we can work with them to update.
3. Senator DeCrescenzo: Nassau County was named the safest county in the United States two years running now by *US News and World Report*; is there any translation between what law enforcement does in the county and what you guys do at Hofstra?
    a. The area is safe and we coordinate with NCPD and HPD to work with the community. We want to bring those partnerships and resources to this university.
4. Senator Annibali: I see cars that drive recklessly, typically on the residential side, and there have been some close calls. What do you think Public Safety can do to ensure safe roads?
    a. We know citations for all would not be the most effective way. Education is our way to do this whether that be through workshops or other methods. We also think about if we need another stop sign or an extra speed bump and then make those changes.
5. Chair Campbell: I work extensively on accessibility. Would public safety be able to integrate accessibility training?
    a. We have talked at length about this but it is hard to work with educators in the case of an emergency. Open to ideas and working on this plan.
6. Senator Kang: As a commuter student, how do you think we could advocate and advertise some of the programs that you offer?
    a. That is something we are working on. Developing a newer campaign for this including communicating directly with students through social media or WRHU or the Chronicle. These are ideas we are working through right now. We

model. Our team learns techniques (de-escalation

Call to order

Meeting Called to order at 6:__ PM EST

A. Quorum Call
    a. Quorum set at 26
B. New Business
    a. Welcome President Poser!
        i. Senator Introductions and Student Questions
            1. Chair T. Doherty moves to open the gallery
                a. Motion seconded
                b. Motion passed
            2. Senator Siegel: If possible, could you elaborate on future mask guidelines for residence halls, and futu re mask mandates on campus?
                a. Unsure at this time. The Governor has changed policy and because of that I have contacted Northwell Health for their guidance. Their policy has changed as of late and this led to our email correspondence with students about mask mandates on campus. This decision is very complex, and science is telling us new things about if we need

3. Senator Velasquez: The prevalent issue on campus is parking spaces, since this is such an issue, what are your thoughts on creating mor e sustainable alternatives to getting around campus?
    a. We are working on this and coming up with a proposal with biking as an alternative. It is very unusual to have a University that has free parking, something that is unique to Hofstra. I do agree that we should be able to figure out a new way that is safe within the campus and the surrounding community.
4. Chair T. Doherty: I understand that at the beginning of your presidency you reached out to the administration about their passion project, so I am wonderi ng, with your presidency, what is your passion project?
    a. It is hard to choose just one. I want to make more of a national reputation for the university. The only way for us to get there would be through specific programs that we invest in. We need to have amore diverse faculty, something we are working on through training and hiring committees. I think athletics is an avenue as well, particularly basketball for us to build upon. Athletics builds community. I came to Hofstra because I saw how the university was creating a strong financial foundation and now we want to make a stronger community through academics.
5. VP Aquino: Can you give us a background on the Provost and the Presidency? How do they work together and the background of the individual that you h ired?
    a. The Provost is in charge of the academic enterprise at a university, like tenure, curriculum, andresearch. My role is broader in that I am responsible for everything, but at a university where academics is the focus, the President and the Provost wil l work together on big issues like increasing research, diversifying research. These are areas that the Provost will spearhead, working with deans. Very important that the Provost and the VPSA work closely together. I chose the new Provost out of a cast of great finalists because he had the best combination of a research background and his knowledge of

severely from COVID-19. We have done our best to protect our campus. We would still strongly encourage students to wear them if they feel comfortable. We are trying to figure out how to strike that balance.

10. Comptroller Kaludis: If you could define what a research based institution is, what does that look like for you?
    a. When you look at schools that have programs beyond

ranking them in relation to retention. These kinds of things create barriers and after just six months this is something I am still learning about and something that will be focused on much more in the coming year. This requires us to look at the climate of the classrooms, advising.

14. VP Aquino: Do you have any questions about our Student Governance?
    a. Right now I am very interested in your opinions on the masking rules, and what you perceive to be the pulse of the student body.
        i. Chair Funk: We met with Jean Peden Christdoulou where we discussed student feedback and I will share with her and you.
